GangSTR: publication under review

Evidence insufficient

The published report links CI run 42253585030, which tested a curated recipe, rather than evidence for the documented failure it describes. Run 42066986140 contains a real build failure at the same tool commit, but its recorded command and full log differ from this publication. No exact originating artifact for the published report and extract was established. The publication's execution claim is withdrawn; this does not assert that the reported build error is fabricated.

Editorial correction, not a new verification

Prepared 2026-11-09T17:22:49Z. No tool was executed and no historical gate, command or log was rewritten. The former execution claim is withdrawn pending sufficient evidence. This is not a finding that the tool works or fails.

Preserved original publication

Open preserved evidence

Recovered evidence

Original artifacts from runs 41308001752, 42066986140, 42216592702 and 42488855247 are preserved independently with their recipes and logs. Run 42066986140 failed at commit 6ea9b2b8daca51dcab1f0e46210622b94b52ff17. The two later trials tested e368b9f4dbf7ab7585036a5ff2e68480d0623c80. None is substituted for the unsupported publication. Their historical conclusions have not been re-certified against the new strict policy.
